

# Malheur County Grasshopper and Mormon Cricket Cost Share Program

The 2024 Oregon Legislature and Oregon Department of Agriculture awarded \$100,000 to Malheur County to support pest management initiatives that mitigate the impact of grasshoppers and Mormon crickets on agricultural crops. *Grant #: ODA-4525-GR*. Landowners within Malheur County may be reimbursed up to 75% of actual cost for treatment, including cost of product and application cost. To be able to distribute 100% of available funds, Malheur County will distribute the funds among those who apply for reimbursement. Because of this Malheur County cannot state a specific reimbursement rate until we receive all reimbursement requests. The County tried to make the application as simple as possible. However, some of the application components are required under the grant award.

## How to Apply

Complete and submit:

- \* Reimbursement application.
- \* Map of treatment area.
- \* Invoices marked paid or receipt for product costs and application costs.
- \* Itemized expenses.
- \* Written statement of outcome or results/impact achieved.
- \* IRS W-9 Form (page 1 of form).

The application and all attachments **must be received by September 27, 2024.**

The application and instructions can be found at [www.malheurco.org](http://www.malheurco.org)
