Eric,

This tower location appears to be completely outside significant sage-grouse habitat. No concerns for meeting any sage-grouse rules.

Thanks again for the conversation today and I look forward to working together. Give me a call any time you have additional questions or concerns.

Cheers  
Nigel

Hello Eric:

I have attached the application for the Berrett Land proposal along with the receipt for payment which you might have seen come across your desk this morning.

Let me know if there are any additional items that I can provide in advance of Thursday's hearing or bring with me. I plan to travel the long way around beginning on Tuesday.
