Eric,
I don't see any issues with the access for this proposal. There is an existing field approach that is abutting the subject property and it appears that ODOT has been using it to access a quarry site. There do not appear to be any restrictions to the frontage there so using an existing field approach for access to a cell tower should not be a problem.
That leads me to my only comment. The site is proposed to be next to an active ODOT owned material source. I don't know if there is a conflict or not as far as blasting. I can check with our folks if you would like.
Thanks for the opportunity to comment.

Hello Eric:

I have attached the application for the Berrett Land proposal along with the receipt for payment which you might have seen come across your desk this morning.

Let me know if there are any additional items that I can provide in advance of Thursday's hearing or bring with me. I plan to travel the long way around beginning on Tuesday.

Thanks,

Patrick Ewing
