County.

Finding: The proposed dwelling is not located in an area that contains fish or wildlife deemed critical or sensitive, and will not interfere with traditional fish and wildlife.

2. Significantly increase cost of accepted farm or forest practices on

surrounding lands devoted to farm or forest use. (Ord. 86, 12-7-1993)

SPECIFIC CONDITIONAL USE CRITERIA

MMC 6-6-8-1 - NONRESOURCE DWELLINGS IN EFU, ERU OR EFFU ZONES:

A. The use:

1. Is compatible with farm uses and is consistent with ORS 215.243; and

Finding: The granting of this application will not result in loss of natural resources, and the amount of open land used for agriculture use will not change. Therefore, the proposed use is compatible with range use.

2. Does not interfere seriously with accepted farming practices on adjacent lands; and

Finding: The proposal is for a non-farm dwelling. Due to the location of the proposed building site and the distance to other existing developments, this will not interfere seriously with the accepted farming and ranging practices on adjacent land.

3. Does not materially alter the stability of the overall land use pattern of the area; and

Added by OAR 660-033-130(4)(a)(D) - June 1, 1998: In determining whether a proposed non-farm dwelling will alter the stability of the land use pattern in the area, a county shall consider the cumulative impact of possible new non-farm dwellings and parcels on other lots or parcels in the area similarly situated. To address this standard, the county shall;

- i. Identify a study area for the cumulative impacts analysis. The study area shall include at least 2000 acres or a smaller area not less than 1000 acres, if the smaller area is a distinct agricultural area based on topography, soil types, land use pattern, or the type of farm or ranch operations or practices that distinguish it from other adjacent agricultural areas. Findings shall describe the study area, its boundaries and the location of the subject parcel within this area, why the selected area is representative of the land use pattern surrounding the subject parcel and is adequate to conduct the analysis required by this standard. Lands zoned for rural residential or other urban or non-resource uses shall not be included in the study area.
- ii. Identify within the study area the broad types of farm uses (irrigated or non-irrigated

crops, pasture or grazing lands), the number, location and type of existing dwellings (farm, non-farm, hardship, etc.), and the dwelling development trends since 1993. Determine the potential number of non-farm / lot-of-record dwellings that could be approved under subsections (3)(a), (3)(d) and section (4) of this rule, including identification of predominant soil classifications, the parcels created prior to January 1, 1993, and the parcels larger than the minimum lot size that may be divided to create new parcels for non-farm dwellings under ORS 215.263(4). The findings shall describe the existing land use pattern of the study area including the distribution and arrangement of existing uses and the land use pattern that could result from approval of the possible non-farm dwellings under this subparagraph:

iii. Determine whether approval of the proposed non-farm / lot-of-record dwellings together with existing non-farm dwellings will materially alter the stability of the land use pattern in the area. The stability of the land use pattern will be materially altered if the cumulative effect of existing and potential non-farm dwellings will make it more difficult for the existing types of farms in the area to continue operation due to diminished opportunities to expand, purchase or lease farmland, acquire water rights or diminish the number of tracts or acreage in farm use in a manner that will destabilize the overall character of the study area.

4. Is situated on generally unsuitable land for the production of farm crops or livestock considering the terrain, adverse soil or land conditions, drainage and flooding, location and size of tract.

B. As a condition of approval, the owner is required to allow the following statement to be entered into the chain of title for the non-farm parcel: (the use of a straw-man may be necessary):

“The property herein described is situated in or near a resource (farm or ranch) zone, where the intent is to encourage agricultural use and minimize conflicts with non-resource uses. Non-resource residents may be subjected to common, customary and accepted farm and ranch practices that are conducted in accordance with federal and state laws but ordinarily and necessarily produce noise, dust, smoke and other impacts. The grantees, including their heirs, assigns and lessees, by the recording of this statement, and in return for allowing a non-resource dwelling on this property, hereby accept the potential impacts of accepted farm and ranch practices as normal and necessary and part of the risk of establishing a dwelling in this area, and grantee acknowledges the need to avoid activities that conflict with nearby resource uses.” Evidence shall be provided showing the lot or parcel upon which the dwelling is proposed to be located has been disqualified for valuation at true cash value for farm use under ORS 308.113.

Finding: The non-resource dwelling will be located on land that is not and has not been farmed due to the lack of soils.

OTHER FINDINGS OF FACT

The applicant has submitted additional Findings of fact in the conditional use application.
