Good Morning Tatiana,

The Manager made it out to the property on Friday. He is concerned that hauling heavy loads in large quantities could cause the crossing to deteriorate quickly. But since that crossing does not belong to us, and we do not maintain it, Mr. Head is free to use it. However, we would like him to know that any damages and repairs would be his responsibility if anything happens because he is the landowner. We recommend that he monitors the condition of the crossing.

Please let me know if we can help with anything else!

**Subject:** Question

Hi Brittany!

I have another question for you. We are working on a proposed access on a property off Mesquite Rd, in Ontario. Please see attached pictures.

Property is located on Map # 16S47E tax lot# 3200, owned by Dallas Head.

The proposal is for a gravel pit and he wants to use that access to go in and out of the property (with trucks full of gravel), which would be crossing that irrigation ditch...

My questions: Is that ok per the Irrigation District? Can they do that? Can they make any improvements to facilitate that? Do you have any concerns about that?

As always, thank you for your time!
