

COVER LETTER RE: NAGAKI FARMS LAND PARTITION

Property Address: 150 Holly Road

To Whom It May Concern,

This cover letter and following materials are for a requested non-resource partition for agricultural lands within Malheur County. The property in question is currently owned by Nagaki Farms and has been farmed by the Nagaki family for several years. The Nagaki's are currently under contract to sell this farmland. The land will continue to be used for agricultural production. This request is to simply split off that portion of land where the existing dwelling and outbuildings reside on the property. These areas are mostly unsuitable for agricultural production due to the existing structures and layout of the property.

We appreciate the opportunity to provide this application for your review and look forward to working with you as we move towards its approval. If you have any questions please do not hesitate to email or call at any time.

Thank you,

A handwritten signature in blue ink that reads 'JP Wagoner'.

CONDITIONAL USE PERMIT

DETAILED SPECIFIC WRITTEN REQUEST

This application is to request a partition split of agricultural land. The current owner, Jerry Nagaki, is in process of retiring and is selling his respective farm parcels. This request is to simply split off a 2 acre portion of the property where the current resident resides so that Mr .Nagaki may sell it to his employee and their family, whom have lived in the house for some time. There will be no change to either property as a part of this partition.

(Attach additional pages if necessary)

Accessory Structure	60'	20'	15'	1,200
Agricultural Structure				
Other				

CONDITIONAL USE CRITERIA – Malheur County Code (MCC) CHAPTER 6-6-7

1. The proposal must be consistent with the goals and objectives of the Comprehensive Plan and MCC.
2. Taking into account location, size, design and operational characteristics of the proposed use, describe how your proposal is compatible with the surrounding area and development of abutting properties by outright permitted uses:
There will be no change to the existing property. The residence currently exists with people living in the home. The split will simply allow the current owner to sale the home and property to his existing employee who lives in the home.

Describe the operational characteristics (hours of operation, equipment used, etc.) of the proposed use:
The property will continue to be used as a single family residence with no business operations or changes.

1. The pro

Describe the number of people/employees/customers associated with the proposed use:
The only people associated with the use is the family that currently resides in the home.

3. What are the existing developments and viewpoints of property owners in the surrounding area?
All of the properties in the immediate vicinity are in agricultural production.

4. The pro

4. The proposed use cannot exceed or significantly burden public facilities and services available to the area. Please describe the impact the proposed use will have on the following public facilities and services and provide letters from the appropriate entities:

Roads: There will be no impact to the roads as the use already exists.

Fire & Police Protection: There will be no impact to fire and police as the use already exists.

4. The pro

Sewer & Water: There will be no impact to sewer and water as the use already exists.

Electrical & Telephone: There will be no impact to electrical and telephone as the use already exists.

Solid Waste Disposal: There will be no impact to solid waste disposal as the use already exists.

5. What effect will the proposed use have on the stability of the community's social and economic characteristics?
The proposed use will have no negative affects on the community. If anything, it will have a positive affect on the community's characteristics as it will allow the existing renters to procure ownership of the homes in which they live, instilling a greater sense of community for them.

6. Demonstrate that the proposed use will not interfere with traditional fish and wildlife use of habitats determined critical or sensitive in the fish and wildlife habitat protection plan for Malheur County.
There are no traditional fish and wildlife habitats in the vicinity of the property.

7. How will the proposed use increase setbacks of structures to reduce possibilities of overshadowing adjoining property, noise, odor or night lighting nuisances during development and operation?
There will be no impact as there is no proposed changes to the property with this application.

8. What are the proposed landscaping improvements for the visual benefit of the subject site and for the improved appearance of the neighborhood and County?
As there are no proposed changes, there are no proposed changes to the existing landscaping. The property is currently landscaped with grass and a garden area. These will remain.

9. The location and size of driveway access points and right of way widening and improvement for present and future traffic circulation consistent with the adopted County road standards or the standards of the appropriate road district and the access management standards of the Malheur County Transportation System Plan.
There are no proposed changes to any access points on the property. It will continue to be used for residential purposes.

As the

10. What is the proposed visual screening of the outdoor waste and storage areas?

There are no proposed screening for the outdoor areas as they will continue to be used for residential purposes only.

11. What efforts will be in place to control and focus the outdoor lighting to avoid glare being directed beyond property limits?

There are no proposed changes to the existing lighting. The main lighting that is viewable from the road would be from the front porch of the home, which has minimal glare beyond its immediate vicinity.

12. Demonstrate how the proposed use will not significantly increase the cost of, or force a significant change to, accepted

How will the proposed development interact with surrounding agriculture uses?

The proposed use will not have a negative impact to any of the existing farm practices in the area. There is no proposed changes with this application and the existing farming on the remainder of the property will continue.

The area is surrounded with different agricultural uses. The majority of the farmground in the area is currently growing wheat.

NON-RESOURCE DWELLING – Malheur County Code (MCC) 6-6-8-1

1. Describe how the proposed dwelling is compatible with farm uses and is consistent with ORS 215.243:
The dwelling currently exists and there will not be any new structures with this application. It

is compatible and consistent as it is located on land unsuitable for farming as it has been
established as a residence for many years and not in agricultural production.

2. Demonstrate that the dwelling will not interfere seriously with accepted farming practices on adjacent lands:
The existing dwelling is not located adjacent to neighboring farm lands and is surrounded

by farm lands of the same owner.

3. Demonstrate that the dwelling will be situated on generally unsuitable land for the production of farm crops or
livestock considering the terrain, adverse soil or land conditions, drainage and flooding, location and size of tract:

The existing dwelling is located on land that would be considered unsuitable for agricultural
production as it has existed for some time. It includes access roads and driveways and similar
which would not lend to productive farming practices.

4. Demonstrate that the dwelling will not materially alter the stability of the overall land use pattern of the area, by
conducting the “Cumulative Impacts Analysis”.

A. What are the types of soils that have been identified within the study area? The types of soils, as shown
on the soil map, are 25A

B. What are the types and numbers of existing dwellings that have been identified within the study area?

Primary Farm dwellings 12 Non-farm dwellings _____

Farm hand/labor dwellings 7 Hardship dwellings _____

C. What are the types of farm use occurring in the study area (row crops, pasture, range land, feed crops)? _____

The majority of the area is used for row crops, with much of that being planted in wheat.

D. What are the number of potential "lot of record" dwellings and non-farm dwellings within the study area?

Lot of Record dwellings 81 Non-farm dwellings _____

E. What are the number of parcels larger than the minimum lot size that may be divided to create new parcels for non-farm dwellings? 68

F. On the parcels where you concluded no potential dwelling(s) will be sited, describe why? This is either due to the configuration of the site and the surrounding topography or due to the existing farming practices occurring on-site.

G. What dwelling development trends have been identified within the study area since 1993? There has been limited dwelling development in the area since 1993 as the vast majority of the area continues to be used strictly for agricultural production.

H. What are the findings of fact that describe the existing land use pattern of what the study area looks like now? The findings of fact are that due to the intense agricultural use that continues to permeate the area, the land use pattern has remained essentially unchanged. This application does not intend to change that in any way as the proposed dwelling already exists and there are no planned changes with the dwelling.

I. What are the findings of fact that describe what the study area would look like if all the potential development occurs? Due to the large parcel sizes of the majority of the parcels within the study area, if all potential development occurs, it would have limited impact on the area as a whole. There are areas that have smaller parcels, and those areas would see a somewhat negative impact.

NON-RESOURCE DWELLING – Malheur County Code (MCC) 6-6-8-2

1. Describe how the creation of proposed partition(s) is compatible with farm uses and is consistent with ORS 215.243: As the proposed partition will not change the characteristics of the area, since the residence already exists it will continue to be compatible with the existing farm uses in the area.

2. Will the proposed partition(s) interfere seriously with accepted farming practices on adjacent lands and what conditions exist to avoid this problem? There will be no interference with adjacent farm lands. The residence already exists on the property, and has for some time. The family that currently lives in the home will continue to do so, but now they will have the pride of ownership rather than as renters.

3. Demonstrate that the proposed partition(s) will not materially alter the stability of the overall land use pattern of the area: Due to the fact that no new residences are being proposed with this application it will not stimulate any additional residential growth in the area.

4. Will the proposed partition(s) be situated on generally unsuitable land for the production of farm crops or livestock considering the terrain, adverse soil or land conditions, drainage and flooding, location and size of tract: No

3. If yes:

- Is the proposed parcel only as large as necessary to accommodate the use and provide any buffer area needed to ensure compatibility with adjacent agricultural uses? Yes, the partition is being kept as minimal as possible so as to accommodate the existing agricultural production on the surrounding property.

3. If yes:

- Is the proposed parcel located on land with predominantly low productivity V-VII soils not suited for agricultural use and is large enough to accommodate the use and provide any buffer area needed to ensure compatibility with adjacent agricultural uses? How so? Yes, the partitioned property contains the existing home, driveway, and parking areas and any other minimal areas to meet the required parcel size requirements.

5. In what ways will the proposed partition avoid conflict with and have no significant adverse impact on:

- the quality of farm or range land: Due to the fact that there is no proposed change to the property there will be no significant impacts.

- the watersheds: Due to the fact that there is no proposed change to the property there will be no significant impacts.

- fish and wildlife habitat: Due to the fact that there is no proposed change to the property there will be no significant impacts.

- soil and slope stability: Due to the fact that there is no proposed change to the property there will be no significant impacts.

- air and water quality: Due to the fact that there is no proposed change to the property there will be no significant impacts.

- outdoor recreation areas: Due to the fact that there is no proposed change to the property there will be no significant impacts.

6. Will the proposed partition be created for an existing dwelling or for preserving a historical dwelling?
Yes, the proposed partition is for an existing dwelling. There are no proposed changes to the dwelling.
