

STAFF REPORT

Planning Department File No. 2023-02-013

CONDITIONAL USE APPLICATION FOR ONE NON-FARM DWELLING AND ONE NON-FARM PARTITION

Planning Commission Meeting Date: March 23, 2023

1. **OWNER OF RECORD:** Lequerica Bros Inc
3446 Lequerica Ln
Arock, OR 97902
2. **PROPOSED ACTION:** Conditional Use approval for one non-farm dwelling and one non-farm partition (2.5 acres).
3. **PROPERTY IDENTIFICATION:** Tax Lot 1800, T30S, R42E, Sec. 25; Assessor's Map 30S42E; Malheur County Reference #12450.
4. **PROPERTY LOCATION AND DIRECTIONS:** From the townsite of Arock, OR, head east on Oregon Ave; continue for $\frac{3}{4}$ mile. Turn left onto Lequerica Ln. Continue for $\frac{1}{2}$ mile. The destination will be on the right, past 3442 Lequerica Ln, Arock.
5. **ZONING:** Exclusive Range Use (C-A2).
6. **PARCEL SIZE:** The property is 124.88 acres.
7. **PARCEL USE:** The property is currently being farmed (row crops) and a portion is used as range land. There are also three residences.
8. **SURROUNDING USE:** The property is surrounded in entirety by farm or range land.
9. **ACCESS:** The proposed non-farm partition will have a shared access off Lequerica Ln and a private easement (Letters attached).
10. **SANITATION REQUIREMENTS:** A new DEQ approved sanitation system would be required.
11. **FIRE PROTECTION:** The subject parcel is within Jordan Valley Rural Fire District. (Letter attached).
12. **NATURAL HAZARDS:** None.
13. **WATER RIGHTS:** The property has water rights from the Jordan Valley Irrigation District. There are no water rights on the site of the proposed non-farm partition. (Letter attached).

14. SOIL TYPE: The soils on the parent property are a mix of class V and VI. The site of the proposed partition is covered in soils of class V.

15. ZONING HISTORY: There is an existing dwelling, built in 1930 and two manufactured homes that were sited in 1974 and 1979. There are several farm-use buildings and corrals. There is no other known zoning history.

GENERAL CONDITIONAL USE CRITERIA

MCC 6-6-7 - GENERAL CRITERIA TO EVALUATE SUITABILITY: In considering the suitability of proposed conditional uses, the Planning Commission shall base its decision upon the following criteria:

- A. Comprehensive Plan goals and policies, as applicable.
- B. Specific plan recommendations

Proposed Finding: MCC 6-6-8-1 regulates the conditional use process for a non-farm dwelling and MCC 6-6-8-2 regulated the conditional use process for a non-farm partition.

- C. Existing development and viewpoints of property owners in the surrounding area.

Proposed Finding: Letter notice was sent to adjoining landowners on March 3, 2023 and published in the Argus Observer on March 1, 2023. No comments were received.

- D. Availability of services and utilities.

Proposed Finding: The entire parent parcel is located within the Jordan Valley Rural Fire District. All services and utilities are available.

- E. The effect of the proposed use on the stability of the community's social and economic characteristics.

Proposed Finding: The proposed dwelling will have no effect on the farming/ranching practices that would interfere with the stability of the community's social and economic characteristics, due to the fact that the proposed partition is on unirrigated land, and hadn't been used for farming.

- F. It does not interfere with traditional fish and wildlife use of habitats determined critical or sensitive in the Fish and Wildlife Habitat Protection Plan for Malheur County.

Proposed Finding: The proposed dwelling is outside the sage grouse habitat. There is no identified critical fish and wildlife habitat. Because of those findings, the proposed structure would not interfere with traditional fish and wildlife.

- G. General Criteria

- 1. Increasing setbacks of structures to reduce possibilities of overshadowing

adjoining property, noise, odor or night lighting nuisances.

Proposed Finding: The proposal is for one non-farm partition and one non-farm dwelling. The nearest home site will be at least 140 ft away and there will be no impacts on adjoining properties.

2. Landscaping improvements for the visual benefits of the subject site and for the improved appearance of the neighborhood and County.

Proposed Finding: The proposed dwelling would benefit the appearance of the neighborhood and County.

3. Location and size of driveway access points and right-of-way widening and improvement for present and future traffic circulation and safety.

Proposed Finding: The proposed non-farm partition will have access off Lequerica Ln. The access would be shared by the other residences on the parent parcel. A letter from Jordan Valley Rural Fire Department was submitted, that found the access to be adequate to be used for emergency response.

4. Visual screening of outdoor waste and storage areas.

Proposed Finding: The proposed development is for dwellings. Outdoor waste storage will be minimal. There will be a contract with Ontario Sanitary Services for solid waste removal.

5. Control and focusing of outdoor lighting to avoid glare being directed beyond property limits.

Proposed Finding: Control of outdoor lighting will not be necessary.

6. Special criteria listed below, as applicable:

H. Allowance of Certain Uses: A use allowed under Section 6-3A-3 of this Title shall be approved only where it is found that the use will not:

1. Force a significant change in accepted farm or forest practices on surrounding lands devoted to farm or forest use; or
2. Significantly increase cost of accepted farm or forest practices on surrounding lands devoted to farm or forest use. (Ord. 86, 12-7-1993)

Proposed Finding: The proposed non-resource dwelling will not force significant change in accepted farm or forest practices on surrounding lands devoted to farm use, nor significantly increase the cost of accepted farm practices. There will no net loss of the farmed ground on the parent parcel. The parent parcel is surrounded by properties that are zoned exclusive range use. These properties will not be impacted by the placement of a new dwelling on the proposed non-farm partition.

SPECIFIC CONDITIONAL USE CRITERIA

MCC 6-6-8-1 - NONRESOURCE DWELLINGS IN EFU, ERU OR EFFU ZONES:

A. The use:

1. Is compatible with farm uses and is consistent with ORS 215.243; and

Proposed Finding: The current farming and ranching practices will continue. The construction of the non-farm dwelling will aid the existing family farming and ranching activities in the area. All existing farm ground in this proposal will remain unchanged. The granting of this application will not result in loss of natural resources, and the amount of open land used for agriculture use will not change. Therefore, the proposed use is compatible with farm use.

2. Does not interfere seriously with accepted farming practices on adjacent lands; and

Proposed Finding: The site of the proposed partition is not currently being farmed. Therefore, a single-family dwelling on this partition will not interfere with adjacent farm practices.

3. Does not materially alter the stability of the overall land use pattern of the area; and

Proposed Finding: Due to the condition of the soils and zoning history of the parcel, there is no other further development anticipated within the study area.

Added by OAR 660-033-130(4)(a)(D) - June 1, 1998: In determining whether a proposed non-farm dwelling will alter the stability of the land use pattern in the area, a county shall consider the cumulative impact of possible new non-farm dwellings and parcels on other lots or parcels in the area similarly situated. To address this standard, the county shall;

- i. Identify a study area for the cumulative impacts analysis. The study area shall include at least 2000 acres or a smaller area not less than 1000 acres, if the smaller area is a distinct agricultural area based on topography, soil types, land use pattern, or the type of farm or ranch operations or practices that distinguish it from other adjacent agricultural areas. Findings shall describe the study area, its boundaries and the location of the subject parcel within this area, why the selected area is representative of the land use pattern surrounding the subject parcel and is adequate to conduct the analysis required by this standard. Lands zoned for rural residential or other urban or non-resource uses shall not be included in the study area.
- ii. Identify within the study area the broad types of farm uses (irrigated or non-irrigated crops, pasture or grazing lands), the number, location and type of existing dwellings (farm, non-farm, hardship, etc.), and the dwelling development trends since 1993. Determine the potential number of non-farm / lot-of-record dwellings that could be approved under subsections (3)(a), (3)(d) and section (4) of this rule, including identification of predominant soil classifications, the parcels created prior to January 1, 1993, and the parcels larger than the minimum lot size that may be divided to create new parcels for non-farm dwellings under ORS 215.263(4). The findings shall describe the existing land use pattern of the study area including the distribution and arrangement of existing uses and the land use pattern that could result from approval

of the possible non-farm dwellings under this subparagraph:

- iii. Determine whether approval of the proposed non-farm / lot-of-record dwellings together with existing non-farm dwellings will materially alter the stability of the land use pattern in the area. The stability of the land use pattern will be materially altered if the cumulative effect of existing and potential non-farm dwellings will make it more difficult for the existing types of farms in the area to continue operation due to diminished opportunities to expand, purchase or lease farmland, acquire water rights or diminish the number of tracts or acreage in farm use in a manner that will destabilize the overall character of the study area.
 4. Is situated on generally unsuitable land for the production of farm crops or livestock considering the terrain, adverse soil or land conditions, drainage and flooding, location and size of tract.
- B. As a condition of approval, the owner is required to allow the following statement to be entered into the chain of title for the non-farm parcels: (the use of a straw-man may be necessary):

“The property herein described is situated in or near a resource (farm or ranch) zone, where the intent is to encourage agricultural use and minimize conflicts with non-resource uses. Non-resource residents may be subjected to common, customary and accepted farm and ranch practices that are conducted in accordance with federal and state laws but ordinarily and necessarily produce noise, dust, smoke and other impacts. The grantees, including their heirs, assigns and lessees, by the recording of this statement, and in return for allowing a non-resource dwelling on this property, hereby accept the potential impacts of accepted farm and ranch practices as normal and necessary and part of the risk of establishing a dwelling in this area, and grantee acknowledges the need to avoid activities that conflict with nearby resource uses.” Evidence shall be provided showing the lot or parcel upon which the dwelling is proposed to be located has been disqualified for valuation at true cash value for farm use under ORS 308.113.

Proposed Finding: Due to the inexistence of the water on the proposed partition, it cannot be reasonably put to farm use in conjunction with other land. From these facts, it is concluded that the proposed dwelling will be generally placed on unsuitable land for the production of farm crops and livestock.

MCC 6-6-8-2: NONRESOURCE PARTITION IN AN EFU, ERU OR EFFU ZONE:

- A. Nonfarm Use: The creation of all new parcels intended for nonfarm use shall meet the following requirements:

1. Is the proposed use compatible with agriculture uses and is it consistent with ORS 215.243. How? Address each issue;

Proposed Finding: The proposed non-farm partition will be 2.5 acres, enough to reasonably accommodate the placement of a home with landscape. The proposed partition site currently does not have water rights. The remaining farm land will not be impacted.

2. Is the proposed use located where it may interfere seriously with accepted farming practices on adjacent lands? What conditions exist to avoid this problem?

Proposed Finding: The proposed partition is located on vacant land and is outside of farm operations.

3. Will the proposed use materially alter the stability of the overall land use pattern of the area?

Proposed Finding: The site of the partition is currently undeveloped, not suitable for farming.

4. Is the proposed use situated on generally unsuitable land for the production of agricultural crops or livestock considering the terrain, adverse soil or land conditions, drainage and flooding, location and size of tract? If so, the following factors must be met:

- a. If located on range or agricultural lands, are the proposed nonresource parcels only as large as necessary to accommodate the use and provide any buffer area needed to ensure compatibility with adjacent agricultural uses? The intent is that Class I through IV soils be included within nonagricultural parcels only when the limited extent or physical configuration of such soils make it impractical to keep them consolidated in an agricultural parcel.
- b. Are the proposed parcels located on land with predominantly low productivity V through VII soils not suited for agricultural use and are large enough to accommodate the use and provide any buffer area needed to ensure compatibility with adjacent agricultural uses?

Proposed Finding: The soils on the proposed partition is categorized as class V, however there are no water rights on this site and it never has been farmed.

5. A new nonfarm parcel shall not be approved for a use that will have a significant adverse impact on the quality of farm or range land, watersheds, fish and wildlife habitat, soil and slope stability, air and water quality, or outdoor recreation areas. In what ways do the proposed parcels avoid conflict with these items?

Proposed Finding: The natural landscaping will be used to minimize the impact and conflict with the farm. The watershed from the proposed non-farm partition will be generally contained onsite. The proposed development will meet environmental standards for air and water quality.

6. Is an existing dwelling used as a residential home for up to six (6) persons who fit within the definition of persons listed in ORS 443.400(5) through (10)?

Proposed Finding: The proposed partition is for a single-family residence that fits the criteria listed in ORS 443.400(5) through (10).

7. Is an alternative dwelling used so that a historical dwelling may be preserved without occupation as provided by ORS 215.263(8)(b).

Proposed Finding: There are no historical dwellings that are located on the parent parcel.

PROPOSED CONDITIONS OF APPROVAL

1. The following statement must be entered into the chain of title for the new non-farm dwelling parcel: (Parent parcel is Tax Lot 1800, T30S, R42E, Sec. 25; Assessor's Map 30S42E; Malheur County Reference #12450.)
“The property herein described is situated in or near a resource (farm or ranch) zone, where the intent is to encourage agricultural use and minimize conflicts with non-resource uses. Non-resource residents may be subjected to common, customary and accepted farm and ranch practices that are conducted in accordance with federal and state laws but ordinarily and necessarily produce noise, dust, smoke and other impacts. The grantees, including their heirs, assigns and lessees, by the recording of this statement, and in return for allowing a non-resource dwelling on this property, hereby accept the potential impacts of accepted farm and ranch practices as normal and necessary and part of the risk of establishing a dwelling in this area, and grantee acknowledges the need to avoid activities that conflict with nearby resource uses.”
2. Evidence shall be provided showing the parcel upon which the dwelling is proposed to be located have been disqualified for valuation at true cash value for farm use and the back taxes have been paid for the previous ten (10) years.
3. Adequate access shall be secured for the non-farm partition, by dedicated easement and a road maintenance agreement.
4. Adequate firebreaks shall be constructed and maintained to minimize danger from potential wildfire.
5. This approval is valid for four years from the date of this order. Substantial action must be taken within this time period or the approval will lapse.

EXHIBITS

1. Conditional Use Permit application
2. Letter from Jordan Valley Road Foreman
3. Letter from Jordan Valley Irrigation District
4. Letter from Jordan Valley Rural Fire District
