Good Afternoon Tom,

#10 On Consent Order List:

I have attached a "letter of permission" from Mr. Abercrombie with the Emmett Municipality. This will be our secondary offsite disposal facility, with Clay Peak Landfill being our primary dump site.

As I receive more information due on the consent order list, I will forward you the information.

I apologize but I do not have Valerie's email address in my system. If you can email her contacts to me, that would be helpful so that I can cc her also. If you wouldn't mind emailing her this attachment. As I mentioned last week on the call we had, the first month might be awkward for me getting you the info you need, but once we get into the second month everything should go much smoothly. Thanks for your patience with us.

#9 Must Submit Plans For Proposed Modifications:

There are no construction plans at this point that pertain to changes or modifications to the wastewater system. If we plan to change or modify the wastewater facility we would submit plans to you (IDEQ).

#13 Updated Facility Sitemap:

Mountain Waterworks- Mike Woodworth Engineer is working on this sitemap for us and should have everything prepared by Wednesday of this week.

#14 Flow Schematic:

Mountain Waterworks- Mike Woodworth Engineer is working on this sitemap for us and should have everything prepared by Wednesday of this week.

#15 Southwest District Health:

We had a phone call with Mr. Mitch Kiester for a site visit. He mentioned a date sometime in April, he may be able to come and see the facility. No definite time and day set. Mr. Kiester is out of the Caldwell Idaho office. I will keep you posted on this.

#20 Payment:

We issued a check for the sum of \$19,375 Last week. Check was sent certified mail. DEQ should

receive it this week.

I am still working on:

#11 Load Invoices

#12 Measure Flow Rates

#16 Sample Collecting

This is just a summary of items I have so far, please let me know if I missed anything.

Thanks

Eddie
