**Subject:** Opposition to Minks adventure land theme park

First we live about 1/2 mile across the field from the Minks. This is an agriculture community that grows crops and milks cows for our lively hood. I believe that first our property values would go down. If we wanted to live where its noisy we would have bought in town. Its quiet and for the most point crime free. Letting the Minks put in this park would let everyone know where we all are and what we have in our yards to steal. Last year 1 person told someone our neighbor was out of town and he was cleaned out both house and shop plus several vehicles. This is actually going to trial in oct. The person responsible came walking up from the back of our barn and startled me. Said he was lost. There is nothing back there for a couple miles. I shouldn't have to pack my nine around here to protect myself and property. We have already had issues with people dumping animals and their trash along the road to include tires and mattresses just imagine when more people are aware of this paradise.

So i have big issues with the water slides they want to dig a trench put pipe and take the irrigation water from the boundry line to the pond. Irrigation water has lots of chemicals in it and they are planning on letting the kids run thru it and slide into.

They want to shoot off cannons there is a dairy right across the road. Dairy cows don't produce when there are loud noises and usually end up with mastitis

So what happens when the neighbors on both sides make dust working the field both spring and fall. What happens when the wheat chaff blows into their party, or corn husks. Will the farmers have to change the way they farm.

We don't want the extra traffic its bad enough with all the folks that go back and forth to the prison.

We don't want to hear screaming all day long. I know they said there is a rock crusher near them but they knew that when they bought.

I don't know where he thinks these deer come from that he thinks they stay with all three noise but i guarantee that they won't stay. We all enjoy seeing the deer and wild turkey, quail, and pheasants they stay because there is no noise. I think it's great he wants to provide memories but not out here. If we wanted to live by an amusement park we would have moved there.

PLEASE reconsider letting them do this

Thank you
