RE: Impacts on Fire Suppression - Portable Concrete Batch Plant

Mike,

The area described SW of the Farewell Bend Interchange on I-84, (T15S, R45E, Sections 4 & 5, Tax Lot 300) is within the boundaries covered by the Huntington Fire Department.

We have no concerns with a portable concrete batch plant operating in that location. There will be large water storage tanks, one or more water trucks, and other large equipment at the plant site that could be quickly mobilized by the contractor for fire suppression should the need arise.

Please let me know if you have any questions.

Sincerely,

Huntington Fire Department
