

Public Notice
Malheur County Noxious Weed Control
Revised 1/2023

WEED DISTRICT: The entire County is a weed control district known as the Malheur County Weed District. The weed district excludes the boundaries of any incorporated city. The weed district is governed by the Malheur County Court upon recommendations from the Malheur County Weed Inspector.

DESIGNATION OF NOXIOUS WEEDS: Pursuant to ORS 569.360 to 569.495 the following named plants are designated by the Malheur County Court to be injurious to public health, crops, livestock, land, or other property and are noxious.

It is the responsibility of private landowners, the County, State and Federal governments to control these weeds on their respective jurisdictions. Malheur County has prioritized control and/or eradication of these noxious weeds by "A" "B" & "C" classes, with Class A having the highest priority. Priorities may be adjusted by geographic areas at the recommendation of the Weed Inspector. (T) Denotes high priority species by Oregon Department of Agriculture, and * marks plants that have biological controls.

CLASS "A" WEED: A weed of known economic/environmental importance known to occur in the county in very small numbers to make eradication practicable, or not known to occur but its status in surrounding counties makes future occurrence seem imminent.

ACTION – infestations are subject to mandatory eradication/containment County-wide. Eligible for county assistance when funds are available.
